

HOMEOWNER

IMPORTANT!

HVAC INSTALLATION ENFORCEMENT MANDATE

DO THE FOLLOWING TO NOT BE LIABLE:

Before Installation: Confirm that your HVAC installer registers your job with CHEERS and has a building permit for your job.

After Installation: Require that your HVAC contractor has a HERS test performed on your new installation. A HERS test is performed by a 3rd party HERS Rater to ensure proper installation. This test is required by law.

After Testing: Request your CHEERS Project Status Report (PSR) from the HVAC installer or HERS Rater. The PSR verifies all applicable CA Energy Code requirements have been met.

DON'T BE PUT AT RISK!

Non-permitted work
voids all insurance

incase of:

- Fire, Flood, Earthquake
- Roof Damage

Non-permitted work
increases risk to:

- Denial of coverage
- Unsold home
- Liability of a lawsuit
